

Frequently Asked Questions

How many Magic Dice does Fa Xian start with? I can't seem to find where it lists this.

This information was accidentally omitted. Fa Xian is a level one mage, and has 2 Magic Dice.

On page 13 it states that a creature can heal another by rolling under its Intelligence statistic, and can apply a modifier if it has the First Aid Skill. This sounds confusing, is that right?

This section is incorrect. A player character can be healed by another player character by performing a First Aid action that turn. This can be achieved by passing a successful First Aid **Skill Test** as set by the GM.

If a character makes some saves, but doesn't block all incoming damage, when do they respond with a Follow-up?

It should be resolved like this; damage is applied by the attacker, then the defender can attempt to do any Follow-ups in whatever order they wish. Assuming they aren't dead, that is.
